

Contributor name: Ashiq Mehmood Asharaf

Book Proposed: Introductory Linear Algebra: An Applied First Course

Total Chapters: 12

Total Examples: 375

Codable Examples: 165

Attempted Examples: 91

Note:

- 1)** Among all the Codable Examples atleast one example of each type has been coded in R
- 2)** Majority part of Non-Codable Examples include Graphical and Theoretical representations which are too advanced
- 3)** Last Chapter (12th) of tbc is dedicated for MATLAB examples
